## **I D E N T I T Y**

Libe is a brand of excellence operating since 1990s; it realises mechanical work and trophies for industrial, institutional and competitions market.

Each production is realised in our site in Bovisio Masciago (10 km north of Milan) where the company has also Headquarters.

During last years equipments have been renewed in order to ensure a continuous update in processes and a particular attention to environment (led lights installed on site).

Libe Incisioni offers:

- Laser engraving on metallic/plastic/wooden/glass supports
- Mechanical works (milling and turning) on metallic/plastic support
- 3D print
- Sport awards
- Laser cutting for metal/plastic/leather/wood
- 3D laser manufacturing for crystal

## **I M M A G I N A T I O N , C R E A T I O N , R E A L I Z A T I O N**

Specific attention paid for the design phase as clients, closely with our staff, are able to check the sample before the definitive realisation, to estimate the sizing and options of different assembled materials thanks to rendering, laser-cut mock up and/or video broadcasted on our YouTube channel.

## **O U R   M I S S I O N**

After the consolidation of italian market LIBE is looking at international markets for new opportunities of growth.

To increase our presence in West and South Europe, USA and Canada, Middlesbrough and Far East is the new challenge for next five years.

Awards ceremonies represent also outside Italy the main sector of activity for LIBE; from sport competitions and companies awards we expect significative increase and gratification as well as in Italy.

A distinction point with other competitors is the realisation of high customized awards; the brand of the sponsor is enhanced highly.

Quality, harmonious composition and design give LIBE products a long timing value, not only the day of the prize-giving, but also transforming the award into a precious piece to exhibit on the wall of winners.

Among our successes we love to mention a 3 years world partnership with Porsche and with Lamborghini; it represents an important recognition of quality but must also support our action plan to promote reputation of LIBE worldwide.

## **M E C H A N I C A L   W O R K I N G S**

A LIBE must is to keep up with technology; updated equipment consent high quality realization and a larger range of product to offer to the clients. The first computer aided milling center was used in the 1991 and supported our first growth. Flexibility and large range of products and markets represent an added value for LIBE on which we trust also for the next future. The right mix of originality, specificity of models and the steady search of improvement are part of our DNA.

We have CNC controlled turning and milling machines with a manufacturing range up to 1200x800x400 mm and a passage up to  $\varnothing$  300 mm.

## **L A S E R   M A R K**

Laser marking is a distinctive processing technology for indelibility and versatility. Weatherproof, it is ideal for working applications in contact with solvents or subjects of usury. Its versatility finds an excellent field of application in all those situations characterized by numerical variants such as sequential codes, bar codes and qr code.

Using markers laser Libe Incisioni works the most varied materials, from plastic to metal, from glass to wood; solutions that embrace many sectors from industry to crafts.

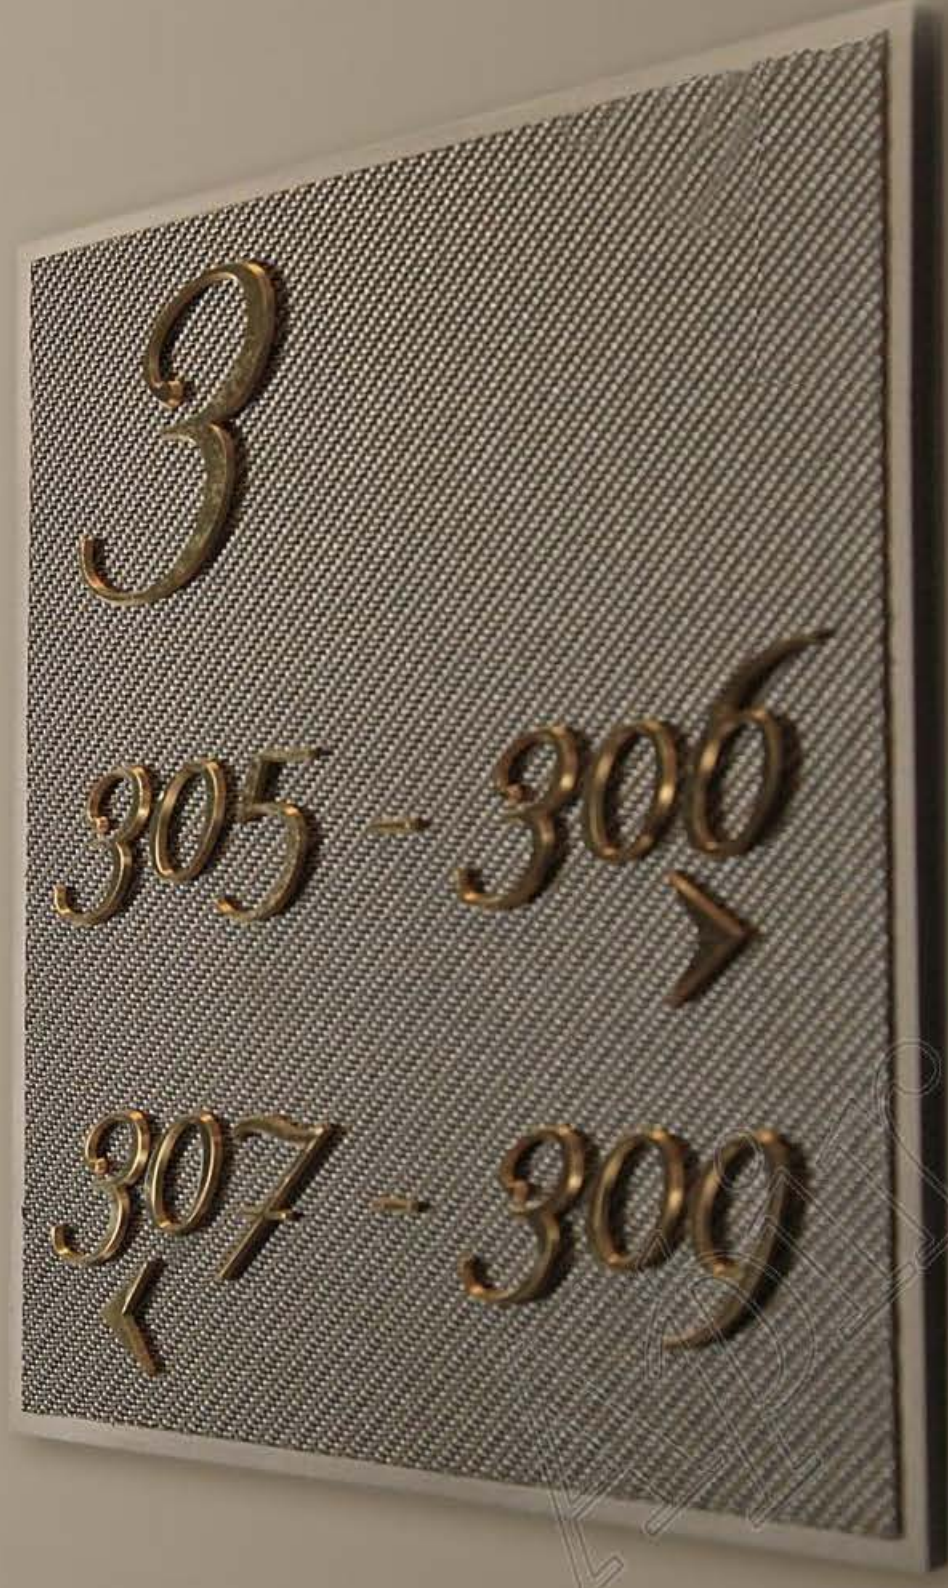

PERFORMANCE

- 
- The image shows a modern elevator lobby. Two glass elevators with vertical ribbing are set into a wall of dark, polished marble. A central white panel features a vertical list of floor numbers and destinations in gold lettering. The floor is covered in a green carpet with a wide, ornate border in gold and white. Small gold plaques are mounted on the white side walls.

## **E X P A N D E D   F O A M**

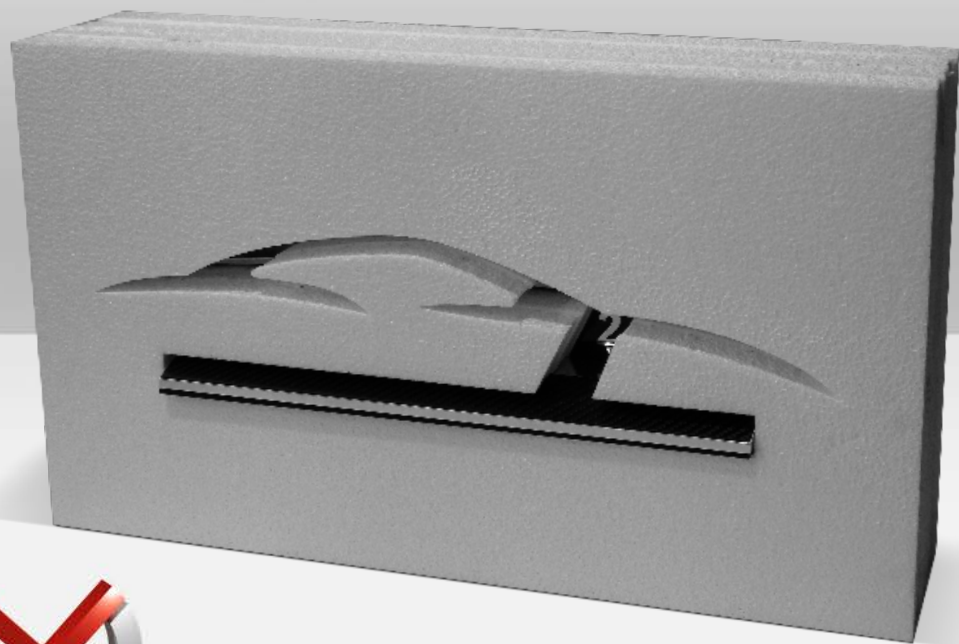

Thanks to a careful development made over the years, LIBE Incisioni has could develop a very versatile and economic system for managing the handling of material on a tray. This system allows a big saving of paper, cellophane (normally used in the past) protecting the material that is transported by any impacts due to transport. Allows also a great reduction in transport costs given the reduction of volumes and a lower impact on the environment. Also in this case, each shape is created using software thus eliminating any plant or die cutting costs.

## **T H E C A S   A N D   E X P O S I T O R S**

We design and manufacture custom-made plexiglass and metal displays, through an initial brief and a careful analysis of the location where your products will be displayed. The right exhibitor must be able to be customized according to the product to be displayed, the weight to support and the location in which it will be exhibited. For this reason all of ours plexiglass or metal displays are all customizable for size, material, shape and graphics. It is important to be able to entrust the right exposure level for your product. Libe Incisioni is a lot also attentive to environmental care, in fact it has been included in the range of acrylic a new product called Green Cast in various thicknesses, the only plastic material that can be recycled to obtain again the original raw material, the monomer.

## **B O A T I N G   A N D   L I G H T E D   S I G N S**

Libe Incisioni realizes writings with different materials and with different techniques. The non-luminous writings are made with fronts in stainless steel (aisi 316 L) with satin or mirror finish or directly milled from aluminum sheet (T6082 - Avio Metal - Ergal) always in the same finishes. The bright ones can be made with acrylic fronts in 3/6 mm thickness in multiple colors, also metallic. The front of this type of letter is fixed directly to the block by means of pins or specific structural adhesive. The underlying block is milled to contain LED lighting with clear light or complete RGB o-ring for guarantee the IP68 protection generally required for outdoor and indoor use nautical world. Each type of writing is designed by checking it all the peculiarities before putting it into processing.
